

Procurement Manager & Project Controller

Repulping Technology GmbH & Co. KG is a CleanTech company and offers integrated closed-loop solutions for the recycling industry. The company operates as a Turn-Key-Provider up to the realisation of sustainable plant engineering projects in the recycling economy value chain.

We tackle this problem: Closing the recycling loop by returning “delicate” fibre materials (incl. paper-adhering materials like plastics or aluminium) back to the loop on a more efficient way or even completely. A further advantage: the more efficient dissolution of conventional recovered paper sorts in comparison with the state-of-the-art. The procedure is based on a physical process without the use of chemicals.

We are seeking an experienced Procurement Manager & Project Controller for the management of suppliers and commercial planning as well as the supervision of our project management.

Your strengths and experiences:

- Ideally, a university degree in accounting/finance or a technical study programme with an MBA and yearlong experience in the commercial field.
- Experience in industrial surroundings, ideally in plant engineering
- Strong communication skills, including negotiation skills, paired with high assertiveness and persuasiveness
- Systematic, standardisation-based work method
- Analytical way of thinking and technical affinities, as well as proficiency in MS Office
- Profound knowledge of project management, especially project controlling
- Your strength is a professional work method:
 - Ability to work independently and good organisational skills,
 - A positive mentality in interactions with customers and suppliers,
 - Knowledge of technical English,
 - Proficiency in the fields of IT, business infrastructure and MS Office,
 - Excellent self and time management,
 - Outstanding written, verbal and client-oriented communication skills,
 - Entrepreneurial mindset,
 - Best work results even under a high work load,
 - High attention to detail and focus on fact-based decision making.

Your duties:

- Demand and tender planning of procurement activities, such as technical services and individual plants for a specific project. Tenders are thereby also published on the international level and in close coordination with Management
- Execution of orders, from offer evaluation to the ordering process
- Communication and negotiation with future suppliers and external companies that participate in the project

- Commercial guidance in procurement negotiation
- Elaboration and processing of complex contracts, the supervision of adherence to contracts and handling of contractual breaches
- Independent elaboration of project calculations and participation in the elaboration of customer contracts
- Elaboration and negotiation of delivery and payment terms
- Observation and analysis of procurement markets
- Development of commercial project controlling and regular reporting to Management
- Settlement of customer projects
- Business trips within the country and abroad

Advantages for you at Repulping Technology:

Together we will create sustainable benefits for the environment, for our team and, last but not least, for our clients. In doing so, you will actively help shape the recycling economy of tomorrow related to flows of fibre-based recyclables already today. We offer you short decision-making processes, an extraordinary flexibility, variable remuneration, mobility support, team work, home office and many more small and large advantages. The work location is 86551 Aichach or, alternatively, Dresden.

Contact:

Have we awakened your pioneering spirit and you would you like establish new environmental technologies in the recycling markets? Then please send your formal application documents with specifications regarding availability and salary expectation to:
